The Video Collection Series for PMR & SPM Science Subjects

Contains a repository of videos for selected topics in PMR Science and SPM Chemistry, Biology and Physics subjects.

It illustrates an inquiry-oriented approach to the study of science that can strengthen teachers' understanding and help them begin to teach through inquiry. The videos in the series show the connection between science and events outside the classroom. Thus, students will be taught to better perceive the relevance of science to their lives and better understand nature.
